

IBS Conference on **Advanced Optical Imaging**

WELCOME REMARKS

It is our distinct pleasure to invite you to IBS Conference on Advanced Optical Imaging to be held in Seoul, Korea, from June 19 to June 21, 2019. As we all are aware, the advances of optical imaging in its spatial resolution, imaging depth, speed, sensitivity and specificity have played pivotal roles in promoting our understanding in life science and expanding the diagnostic capability in medicine. In this 3-day focused meeting, we will bring together about 15-20 leaders from across the world to discuss the latest results and future perspectives of various powerful imaging modalities such as super-resolution and single-molecule imaging, coherent Raman imaging, deep-tissue imaging and quantum imaging. We expect that the conference will serve as a venue for discussing the challenges that each imaging modality has faced and exchanging ideas for potential breakthroughs.
